

So why purchase I.T. as a Utility? - You already do!

Remember answering machines?
Those boxes that hooked to your
telephone with a tape cassette that
recorded incoming calls?

They continued to evolve in
complexity until... Telephone companies
introduced affordable voicemail services
to their customers and almost overnight
those ubiquitous devices turned into
dinosaurs and started vanishing.

"HELLO -
THIS IS
THE 20TH
CENTURY -
WE'D LIKE ALL
OUR CLUNKY
STUFF BACK"

MONTHLY UTILITIES

Just like our dearly departed answering machines,
the job your computers do can be served up in
an affordable, infinitely more reliable and hassle-free
service instead of clunky machines which will
break and require constant tending.

The **CompleteCloud Utility Model** also allows
your business to purchase only the technology
that you use from a month to month basis enabling
you to stay flexible and effective.

LET US MOVE I.T. FOR YOU!

GET **I.T.** OFF THE GROUND

A game-changing solution
for the chronic problems
and resource drain of keeping
your I.T. infrastructure intact,
current and most importantly:
EFFECTIVE.

It's time to **rethink I.T.**

... AND INTO THE CLOUD!

Think about I.T.

The value to your business' information technology is in what it "does" - not what it "is".

Yet companies spend more resources on buying, maintaining and updating I.T. than the very thing they're in business to do!

CompleteCloud delivers everything you're accustomed to and rely on I.T. for while freeing your company from the endless burden of capital investment, maintenance and keeping up to date.

I.T.'s Better Up Here:

New Technology:

CompleteCloud delivers a brand new IT Home: new servers, new Virtual PCs and new ThinClients; All with \$0 capital investment. Never buy another computer again.

Support:

Your **CompleteCloud** account is monitored, maintained and upgraded 24/7 right here in the United States. Our help desk is open all night if you need to chat.

Continuity:

Your hardware, software, data and in-house geek are 100% backed-up automatically. Now that's a disaster plan!

Safety:

Since your critical data resides in **CompleteCloud**, a lost or stolen laptop will not compromise your sensitive information.

Accessibility:

CompleteCloud users access their desktops from anywhere with their ThinClient, personal computers, laptops, tablets and smart phones.

Scalability:

Opening new locations, hiring new employees or even downsizing is quick and painless since you only pay one low price per-user.

Green:

ThinClients use a fraction of the power and have twice the service life of desktop PCs.

Profitability:

You don't need to be an accountant to add up:
More Productive + Less Expensive = MORE PROFIT.

This is a ThinClient

Your expensive desktop PCs and servers are onto the secure **CompleteCloud DataCenter**. Your **ThinClient** is your remote control to your **VirtualPC**. Think of it as the world's longest mouse and keyboard cable.

The CompleteCloud DataCenter

An array of super-computers which are so fast and powerful they can mimic every PC and server within your office. Our centers are redundant, protected by state-of-the-art security and even sheltered from natural disasters.
